Major repairs toPortsea beach seawall

Stakeholder Update, 19 September 2019

Stakeholder update

The Department of Environment, Land, Water and Planning (DELWP) will begin major repairs to the sandbag seawall at Portsea front beach this week.

Pedestrian access to the pier will be maintained during the works. Temporary restrictions will occur at times when trucks are active in the pier access lane. Traffic management will also be in place in the service lane at times when access is required to bring in and remove materials or machinery.

The repair works will see the front face of the sandbag wall replaced with similar but slightly larger bags to ensure it continues to provide protection to the foreshore.

Works will take place Monday to Saturday each week and are expected to take three to four months to minimise any inconvenience during the peak Christmas and January periods.
